Profile

Final-year Computer Science student at Strathmore University with hands-on enterprise networking experience from an internship at KCB Bank Group and a growing portfolio in full-stack and machine-learning development. Currently building a hybrid AI-powered matching and recommendation engine for workforce placement in Kenya. Certified in CCNA networking and AWS Cloud Foundations, and comfortable working across the stack, from network infrastructure to web applications and data-driven systems.

Experience

Regional Network Infrastructure Engineer (Intern) Jan 2026 – Apr 2026
KCB Bank Group *Nairobi, Kenya • On-site*

- Supported the configuration and maintenance of LAN and WAN infrastructure across regional branches using Cisco IOS.
- Configured VLANs, trunking and Spanning Tree Protocol (STP) to keep branch switching environments segmented and loop-free.
- Applied IP addressing and subnetting, routing and site-to-site VPN connectivity in a live banking network environment.
- Contributed to network architecture documentation and troubleshooting of connectivity issues.

Volunteer – IT Support & Digital Literacy Tutor Feb 2024 – Mar 2024
St. Joseph's Primary School *Nairobi, Kenya*

- Provided IT support to keep classroom technology and administrative systems running smoothly.
- Designed and delivered basic computer-literacy lessons, promoting digital inclusion among students.

Projects

Hybrid AI-Powered Matching & Recommendation Engine 2026 – Present
Python, NLP, scikit-learn, BERT embeddings

- Final-year capstone: an engine that matches Kenyan job seekers to roles more accurately than keyword-based job boards.
- Designed a pipeline covering CV/job-description parsing with NLP, knowledge-graph modelling of skills and roles, rule-based filters combined with semantic similarity matching, and predictive candidate ranking.
- Built in a feedback loop so hiring outcomes are used to retrain and improve the model over time.

Education

BSc. Informatics and Computer Science Apr 2023 – Present
Strathmore University *Nairobi, Kenya*

- Focus areas: Software Development, Data Structures & Algorithms, Network Security, Machine Learning.

Certifications

AWS Academy Graduate – Cloud Foundations, Amazon Web Services Jul 2026
Certificate in Informed Consent, TRREE (Research Ethics Evaluation) Nov 2025
CCNA: Switching, Routing & Wireless Essentials, Cisco Networking Academy Apr 2025

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C++, HTML, CSS
Web: React, Node.js, REST APIs, Postman
Data & ML: scikit-learn, NLP, semantic embeddings, feature selection
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Networking: Cisco IOS, Routing, VLANs & Trunking, STP, IP Addressing & Subnetting, LAN/WAN, VPN, TCP/IP
Cloud & Tools: AWS Cloud Foundations, Git & GitHub, draw.io

Additional

Languages: English (Fluent), French (Basic)
Soft skills: Analytical problem solving, communication, teamwork
References: Available upon request
